#### WE WERE THE FIRST

The German technology behind the Atlasware bottle is the prime reason this flask is so incredibly convenient, reliable and trendy. A highly vacuum layer is housed between two layers of durable, high tensile stainless steel. You have to hold it to understand its genius, the last bottle you will ever need.

*Exported to over 15 Countries  
Only manufacturers in India for vacuum  
bottles since 2007  
invented and patented in 2007*

MADE IN INDIA

## STORE 2 TYPES OF FOOD IN ONE HOTCASE

The earth stores molten lava inside its crust and the lava erupts through the vent of volcanoes.

At Atlasware, we took inspiration from the natural phenomenon and designed our versatile hotcase that keeps food hot for up to 18 hours.

The Volcano hotcase is thoughtfully designed to keep the cooked food hot and retains its taste for a longer period. Now cook at your convenience and serve your loved ones freshly cooked food throughout the day without making a trip to the kitchen.
